PROFILE

Senior frontend engineer with **9+ years** shipping **scalable, high-performance** web applications at global IT consultancies — Cognizant, TCS and Infosys. Specialist in **Angular & React** ecosystems with deep expertise in **microfrontend architecture**, **monorepos**, and **design systems** that serve product teams at enterprise scale.

Known for translating UX intent into modular, accessible UI systems — and for measurable engineering wins: **35-40% bundle reductions**, faster Core Web Vitals, zero-defect releases, and reusable libraries that have cut downstream development effort across squads. Cloud-aware (AWS Certified Cloud Practitioner) with a growing focus on frontend system design and observability.

DESIGN-SYSTEM ARCHITECTURE PILLARS

Design Systems

Token-driven component libraries with consistent spacing, typography, color and a11y baked in — adopted across squads to compound velocity.

Microfrontend Mindset

Independent, domain-aligned UI modules inside large-scale monorepos — composable, deployable, testable in isolation.

Performance First

Bundle budgets, code-splitting, lazy routes and image strategy that move Core Web Vitals into the green and shrink time-to-interactive.

Inclusive UX

WCAG 2.1 AA interactions, keyboard navigation, semantic markup and screen-reader-grade flows — usability and inclusion as a baseline.

CURRENT

Senior Associate • Frontend Architecture

Cognizant • Bengaluru

Leading frontend architecture inside a large-scale **monorepo + microfrontend** system. Building scalable Angular 20+ applications with GraphQL, driving bundle optimisation, lazy-loading strategy and reusable UI primitives consumed by multiple product teams. Anchor for accessibility, responsiveness and code-quality standards across the platform.

35–40% bundle size reduction • ~1 MB+ shed**~30%** dev effort saved via shared library↑ **CWV** faster initial load • greener Core Web VitalsOct '22 —
Aug '25

2 YRS 11 MOS

IT Analyst • UI Engineering Lead

Tata Consultancy Services (TCS) • Bengaluru

Led UI development for enterprise-scale applications in **Angular, React and TypeScript**. Translated UX into scalable, performant UI systems, integrated CMS (**Bloomreach**) and observability (**New Relic**), and mentored junior engineers on frontend architecture, testing and review hygiene.

35% faster page load times**0** defect production releases↑ **obs** deeper monitoring & alertingSep '21 —
Sep '22

1 YR 1 MO

Associate • UI Developer

Cognizant • Bengaluru

Built reusable UI components in **Angular & SCSS**, integrated REST APIs, and contributed to a legacy-to-Angular migration. Drove cross-application UI consistency and code reuse.

25% code redundancy reduced**Migration** legacy UI → AngularFeb '17 —
Sep '21

4 YRS 8 MOS

Technology Analyst • Frontend Engineer

Infosys • Bengaluru

Developed responsive, accessible web applications using **HTML, CSS and JavaScript**. Partnered with backend teams on seamless integration. Recognised internally for impact on usability and accessibility outcomes.

40% improvement in usability scores
